About me

Experienced Site Reliability Engineer and Cloud Solution Architect, with over 9 years of professional experience, specializing in DevOps principles with dual AWS certifications. As the SRE Team Lead at Onenex, I have consistently excelled in automating infrastructure, ensuring scalable systems, and implementing robust CI/CD pipelines, particularly leveraging AWS managed services. And constantly exploring new ways to optimize and enhance software development processes for peak efficiency and reliability.

Beyond my technical achievements, I showcase leadership by organizing and contributing to AWS community in Myanmar, and I actively contribute through articles on DevOps and AWS related topics at kalaung.org. This initiative not only highlights my expertise but also contributes to creating a culture of continuous learning within the tech community.

Working Experience

Onenex

Jul 2022 - Current
