About me

I'm a web developer with a focus on web development and deployment, backed by over 4 years of professional experience. Currently, I'm deeply involved in two key projects: LifeYoung Medical Hospital's E-commerce Project and the Methodist Service of Association Project, both based out of Hong Kong offices. We're in the final sprint of development for these projects.My role is centered around constantly exploring new avenues to optimize and elevatesoftware development processes, ensuring peak efficiency and reliability. This proactive approach not only showcases my expertise but also fosters a culture of continuous learning within the tech community.

Working Experience

Visible One
Web Developer

Aug 2023 - Current
(Remote)

Project LifeYoung Health Center
Developed as a developer, our project includes several key modules:

- Main Services Modules such as Body-Check, DNA-Check, Nutritionist, Vaccine, Emotional Therapy and Children Treatment.

Dynamic content and images, multiple pages, and complex business logic are all key components of our project.

Soft-Guide Software House

Oct 2022 - Aug 2023
(Yangon, OnSite)

Web Developer

Project Sundai SATT (駿台大学受験専門)

Developed as a developer:

- Developed student data and complex database structure as assigned by the senior developer.
- Developed backend with RESTful API (Service and Repository) using PHP (Laravel framework).
- Developed frontend with Axios (data binding) using JavaScript (Vue framework).
- Developed using the Singleton design pattern (SOLID principles) for a high-performance and scalable PHP structure.

駿台大学受験専門 (JavaScript, Vue, PHP, Laravel) focuses on PDF downloads, email, and Excel for students and teachers' data, which are all key components of our project.

Salt & Pixel

Feb 2020 - Nov 2022
(Yangon, OnSite)

Design and Development

Cosmetic Export Products Develop, Design and Advertising
Job Description:

- Designed export product Facebook page posts for Galanz, MayChawYin, USatGyi, and 555 Jaggery
- Developed an internal WordPress webpage using Bootstrap, CSS and vanilla JavaScript.
